

I pay for my XM radio and I would like the right to play whatever stations I wish to on it. From Weather and Traffic reports to Disco are my choices to make not the NAB.

I wish only that the XM radio would have talk shows such as G. Gordon Liddy and Mike Savage, but I know that the NAB would never permit this.

The National Association of Broadcasters should be aware that if public radio was such a quality product without the ENDLESS commercials there wouldn't have been such a high market for XM radio.
